

**Claims:**

1. (Currently Amended) A computer-based system for providing equity based benefits to a person dependent upon equity in property owned by the person, said system comprising:

5           a memory for storing a program; and

          a processor for executing the program, said program comprising:

          (a) code for securing a loan secured by a proportion of the equity, the loan having a principal value for a defined term;

          (b) code for repaying the loan by periodically paying ~~a simple~~ an interest charge  
10   determined on a simple interest basis ~~being a fixed proportion of the principal;~~

          (c) code for investing a residual of the loan;

          (d) code for, if an equity-based retirement savings option is elected, accumulating earnings from the invested residual of the loan; and

          (e) code for, if a life-expectancy retirement annuity option is elected, making a  
15   periodic payment from the residual of the loan; wherein the principal value of the loan becomes due for repayment at the end of the term.

2. (Original) A system according to claim 1, wherein:

          the memory is configured as a plurality of memory modules;

20           the program is configured as a plurality of inter-related program modules stored in corresponding said memory modules; and

          the processor is configured as a plurality of processor modules for executing the program modules, wherein at least some of the plurality of processor modules adapted to communicate over a network.

3. A system according to claim 1, wherein if a rate of return of an investment in which said residual of the loan is invested according to the code (c) falls below a threshold, the program further comprises:

(f) code for capitalising an additional loan amount needed to compensate for a difference between the rate of return and the threshold; and

(g) code for adding said additional loan to the principal of the loan to be repaid at the end of the term.

4. (Currently Amended) A computer program product including a computer readable medium having recorded thereon a computer program for directing a processor to execute a method for providing equity based benefits to a person dependent upon equity in property owned by the person, said program comprising:

(a) code for securing a loan secured by a proportion of the equity, the loan having a principal value for a defined term;

(b) code for repaying the loan by periodically paying ~~a simple~~ an interest charge ~~being a fixed proportion of the principal~~ determined on a simple interest basis;

(c) code for investing a residual of the loan;

(d) code for, if an equity-based retirement savings option is elected, accumulating earnings from the invested residual of the loan; and

(e) code for, if a life-expectancy retirement annuity option is elected, making a periodic payment from the residual of the loan; wherein the principal value of the loan becomes due for repayment at the end of the term.

5. (Currently Amended) A computer-based system for providing equity based benefits to a person dependent upon equity in property owned by the person, said system comprising:

(a) means for securing a loan secured by a proportion of the equity, the loan having a principal value for a defined term;

(b) means for repaying the loan by periodically paying ~~a simple~~ an interest charge ~~being a fixed proportion of the principal~~ determined on a simple interest basis;

5 (c) means for investing a residual of the loan;

(d) means for, if an equity-based retirement savings option is elected, accumulating earnings from the invested residual of the loan; and

(e) means for, if a life-expectancy retirement annuity option is elected, making a periodic payment from the residual of the loan; wherein the principal value of the loan  
10 becomes due for repayment at the end of the term.

6. (Currently Amended) A method for providing equity based benefits to a person dependent upon equity in property owned by the person, said method being implemented on a computer based system comprising at least one program running on a corresponding  
15 at least one computer platform, said method comprising the steps of:

securing a loan secured by a proportion of the equity, the loan having a principal value for a defined term;

repaying the loan by periodically paying ~~a simple~~ an interest charge ~~being a fixed proportion of the principal~~ determined on a simple interest basis;

20 investing a residual of the loan;

if an equity-based retirement savings option is elected, accumulating earnings from the invested residual of the loan; and

if a life-expectancy retirement annuity option is elected, making a periodic payment from the residual of the loan; wherein the principal value of the loan becomes  
25 due for repayment at the end of the term.

7. (Currently Amended) A method of generating, for a person, periodic payments secured by equity in property of the person, the method comprising the steps of:

5 (a) obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by the equity;

(b) repaying the loan by periodically paying, to the first provider over the term, an interest payment determined on a simple interest basis ~~equal to a first fixed proportion of said principal value;~~

(c) paying, to the person, the periodic payments;

10 (d) charging the person, in regard to each said periodic payment, a charge ~~equal to a second fixed proportion of said each said periodic payment~~ determined on a simple interest basis;

(e) investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent  
15 upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); and

(f) repaying, to the first provider at the end of the term, the principal of the loan.

8. (Original) A method according to claim 7, wherein the residual of the loan invested in the investment vehicle at any time during the term of the loan is equal to the principal of  
20 the loan less (i) the accumulated payments made in the steps (b) and (c) from the time the loan was obtained until said any time being considered, plus (ii) the accumulated charges received in the step (d) from the time the loan was obtained until said any time being considered.

9. (Original) A method according to claim 7, wherein the steps (a) – (e) are performed by a second provider and the step (e) is performed by the person.

10. (Original) A method according to claim 9, wherein the amounts paid in the steps (b) and (c) are drawn from the residual of the loan and the amount received in the step (d) is paid into the residual of the loan.

11. (Original) A method according to claim 9, wherein:

the loan is less than or equal to 45% of the equity in the property of the person;  
the first fixed proportion is in a range of 4.0% and 5.5%;  
the second fixed proportion is in a range of 7.5% and 12.0%; and  
the compound rate of return is in a range of 7.5% and 12.0% of the residual of the loan that is invested in the investment vehicle.

12. (Original) A method according to claim 9, comprising the further step of:

(g) charging the person, in regard to each said periodic payment, a charge equal to a third fixed proportion of said each said periodic payment;

13. (Original) A method according to claim 12, wherein the third fixed proportion is in a range of 0.05% and 0.25%.

14. (Original) A method according to claim 12 wherein the profit derived by the second provider comprises the charge levied in the step (g).

15. (Original) A method according to claim 9 wherein the profit derived by the second provider is drawn from the residual of the loan.

16. (Original) A method according to claim 7, wherein the person is one of a natural  
5 person and a legal entity.

17. (Original) A method according to claim 7, wherein the person is a retiree and the property of the retiree is the home of the retiree.

10 18. (Currently Amended) A method of generating, for a retiree, periodic payments secured by equity in the retiree's home, the method comprising the steps of:

(a) obtaining, from a financier, a loan having a principal value for a defined term, wherein the loan is secured by the equity in the retiree's home;

(b) repaying the loan by periodically paying, to the financier over the term, a  
15 ~~simple an interest repayment determined on a simple interest basis comprising a payment equal to a first fixed proportion of said principal value;~~

(c) paying, to the retiree, the periodic payments;

(d) charging the retiree, in regard to each said periodic payment, ~~a simple an interest charge comprising a charge equal to a second fixed proportion of said each said~~  
20 ~~periodic payment~~ determined on a simple interest basis;

(e) investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the simple interest payments to the financier in the step (b) and the periodic payments to the retiree in the step (c) and the simple interest charges paid by the retiree in  
25 the step (d); and

(f) repaying, by the retiree to the financier at the end of the term, the principal of the loan.

19. (Currently Amended) A method of generating, for a retiree, periodic payments  
5 secured by equity in the retiree's home, the method comprising the steps of:

(a) obtaining, by a service provider from a financier, a loan having a principal value for a defined term, wherein the loan is secured by the equity in the retiree's home;

(b) repaying the loan by periodically paying, by the service provider to the financier over the term, ~~a simple an interest repayment comprising a payment equal to a~~  
10 ~~first fixed proportion of said principal value~~ determined on a simple interest basis;

(c) paying, by the service provider to the retiree, the periodic payments;

(d) charging the retiree by the service provider, in regard to each said periodic payment, ~~a simple an interest charge comprising a charge equal to a second fixed proportion of said each said periodic payment~~ determined on a simple interest basis;

15 (e) the service provider investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the simple interest payments to the financier in the step (b) and the periodic payments to the retiree in the step (c) and the simple interest charges paid by the retiree in the step (d); and

20 (f) repaying, by the retiree to the financier at the end of the term, the principal of the loan.

20. (Currently Amended) A system for generating, for a retiree, periodic payments secured by equity in the retiree's home, the system comprising:

(a) means for obtaining, by a service provider from a financier, a loan having a principal value for a defined term, wherein the loan is secured by the equity in the retiree's home;

(b) means for repaying the loan by periodically paying, by the service provider to  
5 the financier over the term, ~~a simple~~ an interest repayment ~~comprising a payment equal to~~  
~~a first fixed proportion of said principal value~~ determined on a simple interest basis;

(c) means for paying, by the service provider to the retiree, the periodic payments;

(d) means for charging the retiree by the service provider, in regard to each said  
10 periodic payment, ~~a simple~~ an interest charge ~~comprising a charge equal to a second fixed~~  
~~proportion of said each said periodic payment~~ determined on a simple interest basis;

(e) means by which the service provider invests a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the simple interest payments to the financier in  
15 the step (b) and the periodic payments to the retiree in the step (c) and the simple interest charges paid by the retiree in the step (d); and

(f) means for repaying, by the retiree to the financier at the end of the term, the principal of the loan.

20 21. (Currently Amended) A computer program product having a computer readable medium having at least one computer program module recorded therein for directing at least one processor to implement a method of generating, for a retiree, periodic payments secured by equity in the retirees home, the at least one program module comprising:

(a) code for obtaining, by a service provider from a financier, a loan having a principal value for a defined term, wherein the loan is secured by the equity in the retiree's home;

(b) code for periodically paying, by the service provider to the financier over the  
5 term, ~~a simple~~ an interest repayment ~~comprising a payment equal to a first fixed~~  
~~proportion of said principal value~~ determined on a simple interest basis;

(c) code for paying, by the service provider to the retiree, the periodic payments;

(d) code for charging the retiree by the service provider, in regard to each said  
periodic payment, ~~a simple~~ an interest charge ~~comprising a charge equal to a second fixed~~  
10 ~~proportion of said each said periodic payment~~ determined on a simple interest basis;;

(e) code for investing a residual of the loan, in an investment vehicle yielding a  
return at a compound rate on said residual of the loan, said residual of the loan being  
dependent upon the simple interest payments to the financier in the step (b) and the  
periodic payments to the retiree in the step (c) and the simple interest charges paid by the  
15 retiree in the step (d); and

(f) code for repaying, by the retiree to the financier at the end of the term, the  
principal of the loan.

22. (Currently Amended) A method of generating, for the benefit of a person and a  
20 service provider, periodic payments dependent upon equity in property of the person, the  
method comprising the steps of:

(a) obtaining from a financier a loan secured by the equity, the loan having a  
principal value and being for a term defined by a number of periods;

(b) investing the loan in a first investment vehicle that yields a first return for each said period on the amount invested; the method further comprising, for a current said period, the steps of:

- (i) ~~withdrawing a first fixed proportion and a second fixed proportion of~~  
5 determining, in regard to the principal value, a first amount determined on a simple interest basis, and withdrawing said first amount from the residual of the loan invested in the first investment vehicle, and determining, in regard to the principal value, a second amount determined on a simple interest basis, and withdrawing said second amount from the residual of the loan invested in the first investment vehicle;
- 10 (ii) paying the first ~~fixed proportion~~ amount to the financier;
- (iii) deducting a charge from said second ~~fixed proportion~~ amount, said charge comprising the benefit for the service provider;
- (iv) investing for the benefit of the person the residual of the second ~~fixed proportion~~ amount in an investment vehicle yielding a second return for the current  
15 period, said second return being lower than the first return;
- (c) repeating the steps (i) – (iv) for said number of periods; and
- (d) repaying, by the person to the financier at the end of the term, the principal of the loan.

20 23. (Original) A method according to claim 22, wherein the financier is the service provider.

24. (Original) A method according to claim 22, wherein in the step (iv) an additional investment is made in the investment vehicle yielding the second return for the current  
25 period.

25. (Original) A method according to claim 24, wherein the additional investment is a savings contribution by the person.

5 26. (Currently Amended) A method according to claim 25, wherein following the step (d) the method comprises further steps of:

(a) obtaining from the financier another loan secured by equity in the persons home, the other loan having a principal value and being for a term defined by a number of periods;

10 (b) investing the other loan and the funds accumulated in the investment vehicle yielding the second return in another investment vehicle that yields a return for each said period on the amount invested; the method further comprising, for a current said period, the steps of:

(i) ~~withdrawing a first fixed proportion and a second fixed proportion of~~  
15 determining, in regard to the principal value, a third amount determined on a simple interest basis, and withdrawing said third amount from the residual of the loan invested in the first investment vehicle, and determining in regard to the principal value a fourth amount determined on a simple interest basis, and withdrawing said fourth amount from the residual of the loan invested in the first investment vehicle;

20 (ii) paying the ~~first fixed proportion~~ third amount to the financier;

(iii) deducting a charge from said ~~second fixed proportion~~ fourth amount, said charge comprising the benefit for the service provider;

(iv) paying the residual of the second fixed proportion to the person;

(c) repeating the steps (i) – (iv) for said number of periods; and

(d) repaying, by the person to the financier at the end of the term, the principal of the loan.

27. (Currently Amended) A computer based method of generating, for a person, periodic  
5 payments secured by equity in property of the person, the method comprising the steps of:

(a) obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by the equity;

(b) periodically paying, to the first provider over the term, an interest payment  
~~equal to a first fixed proportion of said principal value~~ determined on a simple interest  
10 basis;

(c) paying, to the person, the periodic payments;

(d) charging the person, in regard to each said periodic payment, a an interest  
charge ~~equal to a second fixed proportion of said each said periodic payment~~ determined  
on a simple interest basis;

15 (e) investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); and

(f) repaying, to the first provider at the end of the term, the principal of the loan; wherein:

20 (g) if the compound rate in the step (e) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalised and added to the principal of the loan to be repaid to the first provider in the step (f).

28. (Original) A computer based method according to claim 27, comprising the further step of:

- (h) if the compound rate in the step (e) rises above a second threshold, then accumulated surplus funds accruing in the investment vehicle are deducted from the principal of the loan to be repaid to the first provider in the step (f).

29. (Currently Amended) A system for administering an equity based arrangement of generating, for a person, periodic payments secured by equity in property of the person, the system comprising:

- (a) means for obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by the equity;

(b) means for periodically paying, to the first provider over the term, an interest payment ~~equal to a first fixed proportion of said principal value~~ determined on a simple interest basis;

- (c) means for paying, to the person, the periodic payments;

(d) means for charging the person, in regard to each said periodic payment, a ~~an interest charge equal to a second fixed proportion of said each said periodic payment~~ determined on a simple interest basis;

(e) means for investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); and

(f) means for repaying, to the first provider at the end of the term, the principal of the loan; wherein:

(g) if the compound rate in the step (e) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalised and added to the principal of the loan to be repaid to the first provider in the step (f).

5

30. (Currently Amended) A system for administering an equity based arrangement of generating, for a person, periodic payments secured by equity in property of the person, the system comprising:

a plurality of memory modules for storing a corresponding plurality of inter-  
10 related application program modules; and

a plurality of processor modules for executing the program modules, said program modules comprising:

(a) code for obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by the equity;

15 (b) code for periodically paying, to the first provider over the term, an interest payment ~~equal to a first fixed proportion of said principal value~~ determined on a simple interest basis;

(c) code for paying, to the person, the periodic payments;

(d) code for charging the person, in regard to each said periodic payment, a an interest charge ~~equal to a second fixed proportion of said each said periodic payment~~ determined on a simple interest basis;

20

(e) code for investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the  
25 step (d); and

(f) code for repaying, to the first provider at the end of the term, the principal of the loan; wherein:

(g) if the compound rate in the step (e) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalised and added to the principal of the loan to be repaid to the first provider in the step (f).

31. (Currently Amended) A computer program product including at least one computer readable medium having recorded thereon a plurality of inter-related computer application program modules for directing a plurality of processor modules to execute a method for generating, for a person, periodic payments secured by equity in property of the person, said program modules comprising:

(a) code for obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by the equity;

(b) code for periodically paying, to the first provider over the term, an interest payment ~~equal to a first fixed proportion of said principal value~~ determined on a simple interest basis;

(c) code for paying, to the person, the periodic payments;

(d) code for charging the person, in regard to each said periodic payment, a an interest charge ~~equal to a second fixed proportion of said each said periodic payment~~ determined on a simple interest basis;

(e) code for investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); and

(f) code for repaying, to the first provider at the end of the term, the principal of the loan; wherein:

(g) if the compound rate in the step (e) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and  
5 associated interest, is capitalised and added to the principal of the loan to be repaid to the first provider in the step (f).

32. (Currently Amended) A plurality of inter-related computer application program modules for directing a plurality of processor modules to execute a method for  
10 generating, for a person, periodic payments secured by equity in property of the person, said program modules comprising:

(a) code for obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by the equity;

(b) code for periodically paying, to the first provider over the term, an interest  
15 payment ~~equal to a first fixed proportion of said principal value~~ determined on a simple interest basis;

(c) code for paying, to the person, the periodic payments;

(d) code for charging the person, in regard to each said periodic payment, a an interest charge ~~equal to a second fixed proportion of said each said periodic payment~~  
20 determined on a simple interest basis;

(e) code for investing a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); and

(f) code for repaying, to the first provider at the end of the term, the principal of the loan; wherein:

(g) if the compound rate in the step (e) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalised and added to the principal of the loan to be repaid to the first provider in the step (f).

33. (Cancelled)

10 34. (Cancelled)

35. (New) A method of generating, for the benefit of a person and a service provider, periodic payments dependent upon equity in property of the person, said method being implemented on a computer based system comprising at least one program running on a corresponding at least one computer platform, the method comprising the steps of:

(a) obtaining from a financier a loan secured by the equity, the loan having a principal value and being for a term defined by a number of periods;

(b) investing the loan in a first investment vehicle that yields a first return for each said period on the amount invested; the method further comprising, for a current said period, the steps of:

(i) withdrawing an interest charge, determined on a simple interest basis with reference to the principal value, and further withdrawing a fixed proportion of the principal value, from the residual of the loan invested in the first investment vehicle;

(ii) paying the interest charge to the financier;

(iii) deducting a charge from said fixed proportion, said charge comprising the benefit for the service provider;

(iv) investing for the benefit of the person the residual of the fixed proportion in an investment vehicle yielding a second return for the current period, said

5 second return being lower than the first return;

(c) repeating the steps (i) – (iv) for said number of periods; and

(d) repaying, by the person to the financier at the end of the term, the principal of the loan.
